LoDA-SA • nl sets the near range
far
near (unprotected middle)
SWA
a: [0,8)
b: [8,16)
c: [16,24)
d: [24,32)
e: [32,40)
f: [40,42)
sink
no padding
Illustration only: B=8, S=42, sink=4, SWA=8; near/far cut=16
L1 • page competition
far: K1-nb | near: nb
32D: far extrema / near mean
Boundary pages a, e → eligibility
outside K1 / regional page quotas
sink end / SWA start inside a page
Protected → final support
[0,4) ∪ [34,42)
count within final token cap K
Shared 32-coordinate Q/K • L2 logits over full history
page mask → per-Q softmax → KV-group probability mean
One pooled L2 TopK • no regional token quotas
Partitioned • bypass on
gate / candidate gather off
Eligibility ≠ final retention
Selected ∪ protected IDs • deduplicate • |support| ⩽ K
Original-width Q, K, V → one attention softmax on selected support
